

HEAVY DUTY BATTERY BOX

TURN YOUR DEEP-CYCLE BATTERY INTO A PORTABLE POWER STATION!

**WITH DIGITAL DISPLAY
SHOWS CHARGE LEVEL & VOLTS**

HKPBATTBOXB

SPECIFICATIONS

Suitable battery types Lithium, AGM, Calcium, Wet, Gel

Body material ABS plastic (meets UL 94V-0 standard)

Charge method via Anderson plug input or optional VSR

Ports
1 x dual USB outputs
2 x cigarette plug outputs
4 x 50A Anderson plug inputs/outputs
1 x 175A Anderson plug output

Max. battery size (mm) 330 (L) x 175 (W) x 220 (H)

Max. battery weight (kg) 35.0

Cut-out voltage (V) 12.7

Cut-in voltage (V) 13.2

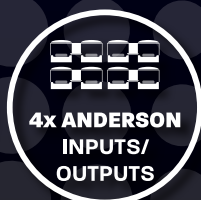

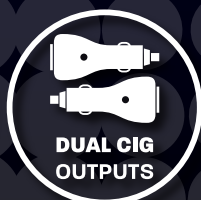

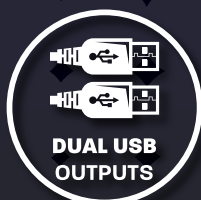

Box dimensions (mm) 455 (L) x 240 (W) x 330 (H)

Operating temperature -10°C to 50°C

**TWO COLOURS AVAILABLE
WHITE & BLACK**

HEAVY DUTY BATTERY BOX

ONE BATTERY BOX, MULTIPLE USES
ACCESSORIES AVAILABLE

READY MADE DUAL BATTERY SETUP

By using the optional Voltage Sensitive Relay (VSR) available for our battery box (part no. HKBATTVSR), you can charge your auxiliary battery from your crank battery while the vehicle's engine is on.

The VSR fits neatly into the lid of the box with no cutting or soldering. It acts as an isolator, allowing the auxiliary battery (inside the box) to charge directly from the crank battery while the car is running (voltage >13.2V). When the ignition is switched off and battery voltage drops below 12.7V, the VSR automatically cuts the link between the batteries.

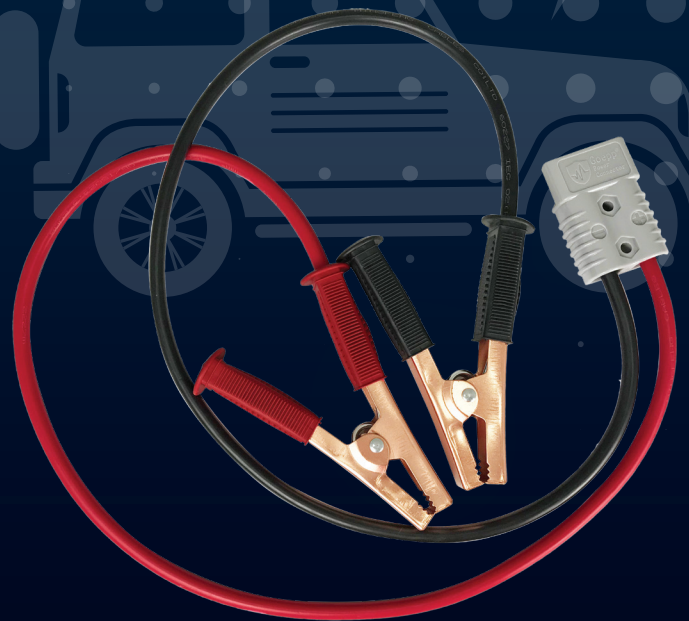

We also offer an optional wiring kit (part no. HKPBATTWIR), which makes it an easy DIY job to install your dual battery setup.

Please note: this VSR may not be suitable for some modern vehicles which are fitted with a Variable Voltage Alternator.

JUMP-START YOUR VEHICLE

Jump starting a vehicle is easy with the Hardkorrr battery box.

Simply insert the 175A jump starter cable (sold separately) into the large Anderson plug outlet on the side of the battery box and connect the clamps to your vehicle battery!

Optional 175A jump starter cable
